

NGRAIN Providing Support to Canadian Land, Maritime, and Air Forces Training Programs

Award-winning 3D equipment maintenance and training solutions deliver results to Canadian Department of National Defence

ORLANDO, FL, December 1, 2008 (I/ITSEC) -- [NGRAIN](#), a leading provider of interactive 3D equipment simulations that maximize the effectiveness of training programs and maintenance support systems, today announced it has received a multi-million dollar order with the Canadian Department of National Defence (DND) under its existing enterprise software contract. The order, which includes new training support and extends existing projects, will provide Canadian Army, Navy, and Air Force personnel with NGRAIN award-winning software solutions for equipment maintenance training.

“NGRAIN has been a proud partner of the Canadian Forces for more than six years and is committed to delivering innovative solutions that exceed training expectations,” said Paul Lindahl, CEO, NGRAIN. “Our team is recognized as a leader in developing training solutions that deliver accurate information in a highly-intuitive format supporting time sensitive, mission-critical training programs for our troops.”

The Canadian DND has provided NGRAIN with the following task orders:

- **Army:** NGRAIN will update the Canadian Expeditionary Force Command (CEFCOM) Landmine Database delivering critical landmine familiarization training and performance support to both Canadian and NATO combat engineers at home, in the classroom, and overseas.
- **Navy:** NGRAIN will deliver Virtual Task Trainers to support technician maintenance training on several marine engines.
- **Air Force:** Leveraging existing NGRAIN 3D simulations already in use by the Air Force, NGRAIN will develop Virtual Task Trainers to support aircraft technician training at several locations. The Virtual Task Trainers will cover a range of subject areas including flight control maintenance, aircraft equipment installation and maintenance, aircraft corrosion training, landing gear maintenance, and communications equipment maintenance.

NGRAIN Virtual Task Trainers adhere to industry standard training methodologies including the Canadian Forces Individual Training & Education System (CFITES). Accelerating training time by 60 percent and improving resolution of maintenance issues by 30 percent, NGRAIN Virtual Task Trainers utilize custom 3D equipment simulations to train personnel on specific tasks, such as providing parts familiarization and skill acquisition training, guiding maintenance practice, repair, or operation tasks (including part removal and replacement), as well as testing and validating student success.

NGRAIN Virtual Task Trainers are conformant with SCORM (the Shareable Content Object Reference Model) and interoperate with the Canadian Forces' Learning Management System. NGRAIN is a key member of the Air Force's Integrated Information Learning Environment program (AFIILE).

About NGRAIN

Sixty-five cents of every dollar spent on a piece of equipment is spent on sustainment. NGRAIN enables organizations to dramatically reduce these costs by maximizing the effectiveness of equipment training programs and maintenance support systems with interactive 3D equipment simulations. With NGRAIN's breakthrough 3D simulation capabilities, customers have been able to accelerate the communication of knowledge by 60%, and improve operational efficiency by 30%.

NGRAIN makes 3D attainable. With NGRAIN, Subject Matter Experts can easily produce, integrate, and distribute 3D simulations, delivering unparalleled real-time 3D interactivity over the web to everyday desktop, laptop, and tablet computers. NGRAIN makes it possible for organizations to transform how they share information, making complex ideas simpler and more accessible to all.

NGRAIN delivers solutions to a host of industries worldwide, including Aerospace & Defense, Energy, and Technology. With its proven, award-winning solutions, NGRAIN has proved to be one of the most trusted names in the realm of 3D technology. NGRAIN's customer base includes all branches of the United States and Canadian militaries, Lockheed Martin, Standard Aero, CAE and other industry leaders.
