

David Miller Rejoins NGRAIN as President & COO

Company adds senior role to support expansion and growth opportunities in North America and Europe

VANCOUVER BC, April 30, 2007 – NGRAIN, provider of 3D performance support solutions, announced today that David J. Miller has rejoined the company as President & COO, reporting to NGRAIN Chief Executive Officer, Paul Lindahl. As President & COO, Mr. Miller will support the execution of NGRAIN's corporate strategy and oversee the company's daily operational activities.

Mr. Miller was NGRAIN's VP of Marketing and Corporate/Business Development, from 2001 – 2004. He was a key member of the team that developed the company's original strategic direction, corporate culture, and brand identity, all of which have resulted in NGRAIN's international recognition as an industry leader. Prior to rejoining NGRAIN, Mr. Miller worked with Engenuity Technologies Inc., to support the company's marketing, financing, and acquisition activities.

"Our recent financing marks a new chapter in our company's corporate development," stated Lindahl. "NGRAIN has successfully transitioned from a technology 'start-up' to an emerging growth company working with some of the largest names in aerospace and defence, including Lockheed Martin, Airbus, the US Army, and the Canadian Forces. As we continue on this successful course of expansion, we see a greater need for two senior roles to carry out the responsibilities of corporate development and operations."

Mr. Lindahl will focus on corporate development activities, working on strategic initiatives that will broaden NGRAIN's market opportunities and accelerate the company's growth in the defense and aerospace industries.

"We are extremely pleased to have David rejoin the NGRAIN team," stated Robert Lord, Chairman of the Board. "David brings to NGRAIN a wealth of knowledge of both the 3D software and hardware markets along with expertise in animation and military and industrial visualization. With David, we not only have a dedicated and talented senior executive, but also someone who is intimately familiar with NGRAIN, its operations, and its expanding opportunities."

About NGRAIN

NGRAIN transforms the sustainment of complex equipment with 3D performance support solutions for the aerospace and defense industry. NGRAIN increases equipment readiness by accelerating learning on complex equipment, enabling first-time-right performance, and reducing maintenance cycle time.

NGRAIN is optimized for web deployment and portable devices. With NGRAIN, anyone can rapidly incorporate interactive 3D equipment simulations into sustainment applications, including courseware and technical manuals. Customers include all branches of the United States military, the Canadian Forces, and

leading defense manufacturers and system integrators, including Lockheed Martin, Northrop Grumman, and CAE.
